

RatePlug

Calculate mortgage information to use in marketing properties.

RatePlug enables agents and lenders to combine their strengths in marketing properties for sale. Connect your trusted mortgage originators to your listings and build trust between consumer, agent, and lender.

Key Features

Generate all-inclusive monthly payment estimates

RatePlug mortgage estimates include principal, interest, taxes, and HOA to give buyers a stronger idea of a home's overall monthly affordability.

Explore different "what-if" scenarios with mortgage payment options

Educate your clients on the different potential costs of homeownership. Do less research on your own, as mortgage originators provide you financing information via RatePlug.

Build custom flyers embedded with lender information

No need to pay for a separate flyer system – lender rates, loan products, and monthly estimates can all be included in custom-made flyers through RatePlug.

Integrate with FHAPros for valuable data on condominiums

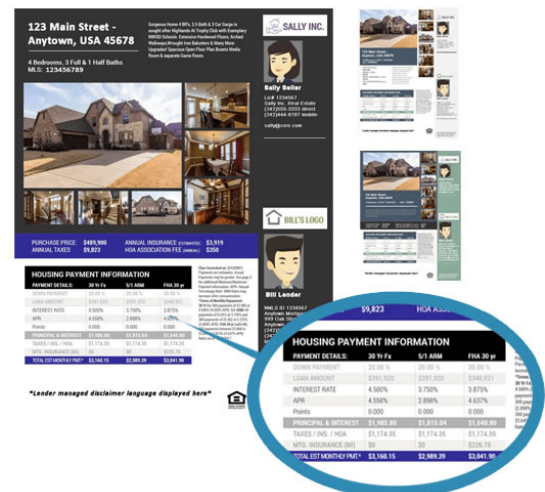

For members of Associations/Boards opted-in to FHAPros: Display unique loan data on FHA-approved and eligible condominiums through RatePlug.

Available For

“ My clients were emailing me to tell me how helpful the mortgage information I had displayed was to them while they were searching for properties. Great tool! ”

– RatePlug User

Agents who use RatePlug close an average of 15% faster than those who don't.

Turn passive buyers into active buyers by helping them understand mortgage costs.
