

## Created to improve your MLS experience

### A first glimpse at the new MLS platform by CRMLS

The CRMLS development team has been hard at work, and we are excited to announce the arrival of a new, intuitive platform designed to improve every user's MLS experience: REcenterhub by CRMLS.

REcenterhub's features will be released in phases, the first one being its new and intuitive dashboard. **On Monday, 10/3, you and other CRMLS participating brokers will receive access to a new dashboard experience.** Look for the new tile on our current dashboard titled "REcenterhub".

### **About the new dashboard in REcenterhub**

REcenterhub includes a new modernized dashboard that brings together most resources in one elegant, customizable interface – revolutionizing the industry standard for all users. The dashboard focuses on the users' experience, allowing for easy access to market statistics (KPIs), education resources, CRMLS communications, product solutions, MLS logins, and more. Users can seamlessly customize, remove, and modify application tiles and sections of the dashboard to make their experience focused and efficient. Industry news and communications tools included in the new dashboard keep users current on the latest happenings.

### **What is REcenterhub?**

REcenterhub is a new, exclusive product ecosystem of CRMLS. It is a distribution center powering critical services for AORs, brokers, and agents. It's a multi-faceted, intelligent MLS platform that brings all the important resources a real estate business needs – all in one place.

Check out our [broker-exclusive webinars](#) to find out more about what to expect from REcenterhub and your new dashboard:

These webinars cover the many features of REcenterhub including how to access communications, navigate the dashboard, find market statistics, and much more.

Once you access REcenterhub on or after 10/3, we encourage you to keep an eye out for a survey link within the dashboard. The survey will encourage CRMLS participating brokers to provide feedback on the new platform.
