

**The new update brings more info in email statistics,
new search enhancements, and more**

These features will arrive 8/15 with no downtime

As part of our continuous efforts to bring you the best MLS experience, we've updated the CRMLS Matrix system with enhancements that take effect **tomorrow, 8/15**. Some of the improvements you can look forward to are:

Email Statistics

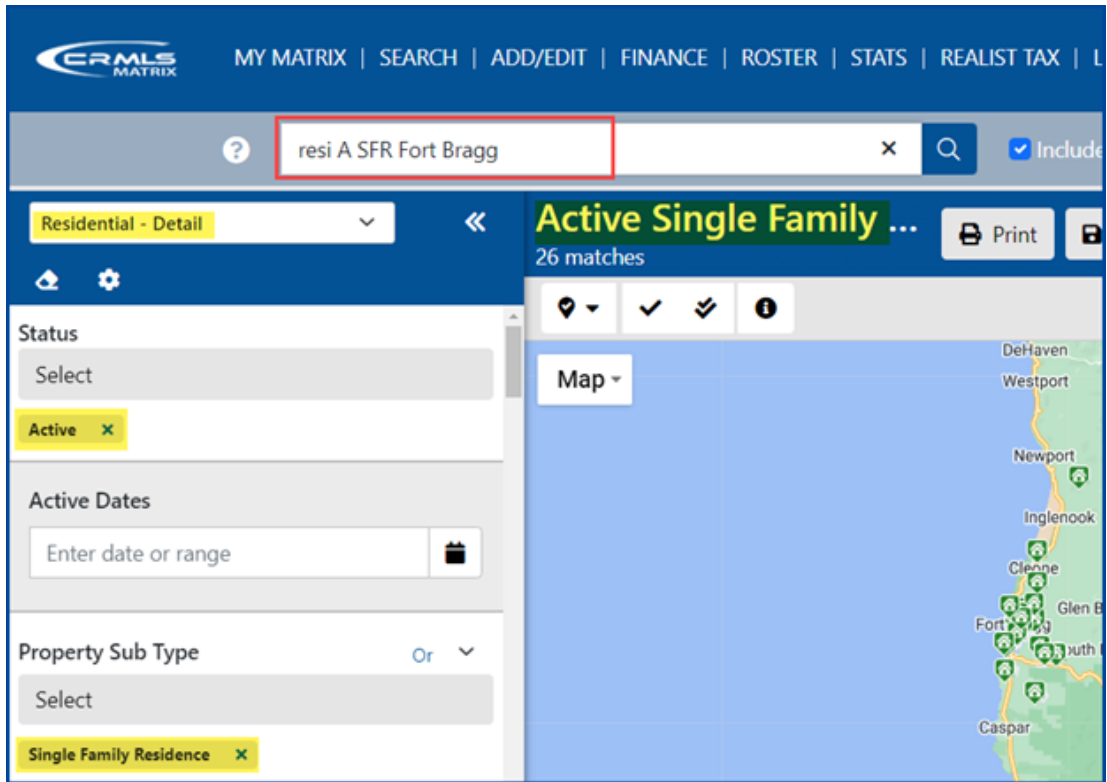

Now when you send statistics over email, instead of just the number of listings used to calculate the results, the Search Criteria caption will now show the full criteria you used to generate those stats.

New Search Enhancements

The New Search in Matrix, which was rolled out in the last update and features a three-panel interface for access to more information all at once, has several new enhancements, including:

- Hovering your cursor over a record in the results pane will make that listing's pin in the map stand out
- Links that open to new windows are now included in results pane columns
- The quick search bar at the top of the page will reflect criteria used in the current search
- and more

For more details on these and more enhancements included in this Matrix update, check out our [Knowledgebase article](#).

We at CRMLS look forward to bringing you this latest CRMLS Matrix update, and thank you for your continued support.
