

Create no-cost 2D floor plans for all your listings

CubiCasa makes getting a floor plan as easy as taking a photo

As of **today, Monday, October 30**, all CRMLS users now have access to [CubiCasa](#), the easiest way to make a custom floor plan. To familiarize you with this new core product, we're holding [two upcoming webinars](#) that will show you everything you need to know.

An advertisement for the CubiCasa app. The main graphic shows a smartphone held by a woman in a business suit, with a 2D floor plan overlaid on the screen. The text "CUBICASA" is at the top, followed by "A free floor plan for every listing". Below this are three key features: "5-10 minute scan for a typical-sized home" (with an alarm clock icon), "No training required, just start scanning" (with a hand icon), and "No special hardware or tripods needed" (with a smartphone icon). At the bottom, it says "Works on both Apple and Android devices" and includes "Available on the App Store" and "GET IT ON Google Play" logos. A small inset shows a "Mobile device view" of the app's interface.

Floor plans are not only one of the most requested listing features but also help drive traffic and click-through rates, so why wouldn't you want one on your listing? With CubiCasa, all it takes is downloading the app, scanning the

interior, and sending the scan to CubiCasa. 24 hours¹ later you'll have your floor plan — it's as simple as that.
