Buying a new home, especially a first home, is a huge undertaking and can be intimidating in any kind of market. [RatePlug](#) helps show buyers that there are more affordability options than they may have realized.

RatePlug is a core CRMLS product that processes mortgage information and calculates payment estimates specific to each listing. You can feature your preferred lenders on RatePlug, and find quality financial data that you and your clients can rely on. This information helps break down each potential purchase into real numbers, and enables your buyers to make informed, data-driven decisions.

There's still space to join Rob Springer, Marketing Director/Partner at RatePlug, for a quick 15-minute overview of all the empowering features the free tool can offer.
