

**Local Logic data tells you about
neighborhoods, amenities, and more**

Access Local Logic insights directly from any listing

If you haven't been using the [Local Logic](#) info that's now available on any property listing, you've been missing out on:

- Demographics
- Walkability Scores
- Neighborhood Profiles
- Noise Levels
- School Data
- Points of Interest
- And more information that your clients want to know

You can find all of this info in your Flexmls mobile app, under the Neighborhood Info tab:

Flexmls users can now provide their clients with detailed information about where a listing is – not just the address, but the neighborhood and surrounding area. Local Logic fills them in on what their livelihoods can include if this property becomes their new home. All of this is featured under the Neighborhood Info tab – and best of all, it's all at no additional cost to CRMLS users.

Local Logic is already integrated with every listing in your MLS system, so start today and show off your in-depth local knowledge to your clients!

Thank you,

California Regional MLS

We've Got You Covered

Education
