Users from both MLSs now enjoy reciprocal listing data

CRMLS Matrix users can view listings from BeachesMLS as of today

CRMLS is proud to announce that reciprocal access to southern Florida's BeachesMLS is now available in the CRMLS Matrix system. This will provide all our Matrix users with access to BeachesMLS's data while giving BeachesMLS users access to CRMLS's data.

BeachesMLS is comprised of Broward, Palm Beach, and St. Lucie County Realtors® and is the third largest Local Realtor® Association in the nation. BeachesMLS currently has more than 43,000 users, boasts 46,000 listings, and represents areas covering over 100 miles of Florida coastline.

CRMLS is committed to making as much data available to our users as possible, whether in California or out. The reciprocated database will improve the accuracy and reliability of sales comparables, offer real estate professionals more of the listing data they need, and simplify transactions between California and Florida counterparts, opening up further possibilities of cross-country deals.

To view BeachesMLS data and listings from their own CRMLS Matrix system, users should navigate to the "LINKS" tab in the top menu, then scroll down to find the "Reciprocal Access" section.

We thank you for your continued support.
